E: technical.help@tenneco.com.au

www.monroe.com.au

Monroe Australia is committed to excellence in customer service. It therefore continues to offer you a service that is unique to Monroe - Monroe's Technical Helpline. With this facility, technical advice and assistance with any Monroe product is only a phone call away.

The Helpline can provide advice and information on vehicle fitment, product range and applications.

If you've experienced a problem and have checked the Monroe catalogue to verify the unit corresponds to the correct part number, referred to any footnotes or instructions and still haven't found a solution then you should ring the Technical Helpline.

The Technical Helpline is just one of the ways Monroe continues to support you and all its customers Australia-wide.

IMPORTANT NOTES BEFORE YOU CALL

To ensure you receive a speedy response please have the following information ready before you call;

- Vehicle make/model/year and build date
- Product name
- Product part number on carton
- Part number and date code stamped on product
- Parts package included
- Description of the problem.

WHY CHOOSE MONROE MAGNUM?

Europe's trucking industry leader is taking
on Australia's logistics and heavy haulage.

While Monroe shock absorbers are more well known in family vehicles, Australia's heavy transport and logistics industry is a strategic focus for Monroe, and a solid opportunity for your company.

That's because Monroe already has runs on the heavy haulage board.

Monroe is the European original equipment supplier of choice for truck brands including CLAAS, DAF and Dennis together with Renault, Scania and Volvo. And this is why.

Monroe's world leading innovations in shock absorber technologies have resulted in market leading advantages, from cab to road, which we are now bringing to the Australian industry.

Across the key areas of Cabin Dampers, Seat Dampers and Axle Shock systems, Monroe can now promise you industry leading quality and performance followed up by second to none, after sales support.

Products and service that major European truck brands and transport corporations are benefiting from right now.

Rest assured, when it comes to support, Monroe Australia is committed to excellence in customer service.

A service that is unique to Monroe - Monroe's Technical Helpline
- with advice and assistance on any Monroe product on 1800 088 205.

Just one of the ways Monroe will support you and all our transport customers, Australia-wide.

MONROE[®]

MAGNUM

ITS IN OUR NAME

PROVEN TOUGH FOR OES AND YOUR HARDWORKING TRUCKS

There's no proving ground more demanding than your hardworking trucks. That's why leading vehicle manufacturers choose Monroe[®] shock absorbers. And it's why commercial vehicle fleet professionals demand the performance and quality of Monroe Magnum[®] shocks. Designed and built by an OE leader. Preferred by many of the most successful vehicle operators worldwide. The right choice for your success.

MONROE[®]

SHOCK ABSORBERS

monroe.com.au

HIGH QUALITY - IT'S ALL ABOUT UPTIME

SHOCK ABSORBERS DESIGNED TO RESIST WEAR WHILE WORKING LONGER AT A HIGHER DEGREE OF SAFETY.

DURABILITY

1. Single bonded rubber bushing: very high durability of the bushing is achieved
 - makes shock installation easier.
2. High temperature resistant sealing system: maximises the durability of the unit.
 - eliminates external droop limiter.

SAFETY

3. Hydraulic lock-out piston: no over-extension of the air bag

RESISTANCE

4. High temperature resistant hydraulic fluid: semi-synthetic fluid improves the damping behaviour
 - more consistent damping over a wide temperature range.
5. Anti-wear coated piston ring: very high wear resistance of the unit
 - more consistent damping thanks to its sealing capabilities.
6. Double action valving system in bump and rebound: guarantees safe handling performance of the vehicle
 - forces on chassis components are kept to a minimum.

CABIN DAMPERS

- 1 Conventional cabin shock
- 2 Coil spring cabin damper with integrated coil spring
- 3 Air spring cabin damper without air spring
- 4 Air spring cabin damper with integrated air spring
- 5 Over-shock air spring
- 6 Stand-alone air spring
- 7 Lateral cabin shock

AXLE SHOCKS

(for trucks, trailers, busses and coaches)

These axle shocks for all kinds of commercial vehicles, transporting goods or people, feature some unique elements like “blow-off” valve and hydraulic stop.

SEAT DAMPERS

The truck driver's comfort is an important contributor to the safety on the road. Monroe is having a range of seat dampers that are compatible with the Isringhausen truck seats. These shocks can be adjustable or not.

OUT PERFORMING THE REST WITH MERRETT LOGGING

Making the transition to Monroe Magnum Heavy Duty shock absorbers has proven to be a major advantage for three decade strong South Australian logging transportation family company, Merrett Logging.

With a total of 30 company owned B-Double configurations in the Merrett Logging fleet and another 10 sub-contractor owned configurations within the company's operations and maintenance schedule, truck and trailer shock absorber durability and lifespan is of vital importance to ensure safe and efficient logging transport operations.

Merrett Logging runs a 12 month total maintenance schedule that includes the replacement of all truck and trailer shock

though they could last well beyond our 12 month replacement cycle."

"The Monroe Magnum truck and trailer shock absorbers enable us to save costs by outperforming the OE and other aftermarket products that we have used in the past."

"Up to 15% of our heavy transporting work is on unsealed gravel roads with long bitumen stretches of approximately 100 kilometres per trip. The quality and

The Merrett Logging trailer fleet includes Plunkett and Elphinstone trailers running BPW, ROR and Fuwa K-Hitch Axles using Monroe Magnum heavy duty shock absorber part numbers F5002 BPW Long, F5004 BPW Short, F5015 & F5075 ROR and F5194 Weweler.

The Monroe Magnum Heavy Duty range covers the key sectors of truck and trailer suspension requirements including cabin dampers, seat dampers and axle shock systems.

Monroe Magnum ride performance product advantages include ease of fitment with single bonded bushings that ensure very high bushing durability, along with a high temperature resistant sealing system and high temperature resistant hydraulic fluid. The Monroe Magnum specially formulated semi-synthetic fluid improves damping behaviour through more consistent damping over a wide temperature range.

More consistent heavy duty vehicle damping is also achieved with the Monroe Magnum anti-wear coated piston ring, providing high levels of wear resistance. Forces on chassis components are kept to a minimum with the Monroe Magnum double action valving system during bump and rebound actions. This assists greatly to achieve safer commercial vehicle handling performances.

Another key advantage of the Monroe Magnum Heavy Duty shock absorber range is the inclusion of a hydraulic lock-out piston that ensures no over-extension of the air bag.

The Monroe Magnum range provides world class quality through durable suspension performance, followed up by Australian sales support that is second to none in the market.

absorbers in their fleet. After four years of using Monroe Magnum Heavy Duty shock absorbers, Maintenance Supervisor and company director John Merrett has been impressed by the quality, durability and cost savings made by selecting Monroe Magnum Heavy Duty truck and trailer shock absorbers.

"We were always replacing our shock absorbers with the OE products, but we found during our maintenance checks that oil seal failures were common even at low kilometres and we also encountered this problem with other aftermarket brands," Mr Merrett said.

"Once we tried the Monroe Magnum range we experienced none of these issues with both our truck and trailer shocks and upon each inspection they looked as

durability of our Monroe Magnum shock absorbers have proven to be excellent under all conditions.

"We look forward to Monroe expanding their heavy duty shock absorber range to cover more of our own and our sub-contractors trucks as their total quality and value for money is exceptional," Mr Merrett added.

TESTIMONIAL

BUILT TO LAST GIVES THE VOTE OF APPROVAL

Monroe Australia's premium quality Magnum range of heavy-duty truck and trailer shock absorbers has checked all the boxes for Queensland based independent transport company, Mansell Bulk Haulage

Sunshine Coast-based Mansell Bulk Haulage has put Monroe Australia's equipment design and manufacturing expertise to the test with a trial of Monroe Magnum heavy-duty shock absorbers on its commercial vehicle fleet. The trial first began in February 2016, and over the last year, Mansell Bulk Haulage's Maintenance Manager, John Beutel, says the innovative shock absorbers have performed beyond his expectations. "The Monroe Magnum shock absorbers have performed very well on both our trucks and trailers. We covered an enormous amount of extreme heavy load mileage across the past year and we have not had an issue with our new Monroe Magnum shock absorbers throughout this trial," John explains.

Mansell Bulk Haulage, which specialises in supplying bulk haulage operations to the construction sector, installed the Magnum shock absorbers on its York Suspension-fitted trailer fleet, which John says are put under heavy strains carrying out the tough task on a daily basis.

"Since we replaced our truck and trailer shocks with the Monroe Magnum product, we haven't had a single worn mounting bush – in fact they still look like new after more than 12 months of rigorous daily heavy-duty concrete haulage," he says.

Aside from the lack of suspension mount bush wear, the company's maintenance team have reported no issues whatsoever with the fitment, John says.

"No one understands better than our drivers when replacements of important components such as suspension products do the job or not. During our trial of the Monroe Magnum heavy-duty shock absorbers, our driver feedback has been 100 per cent positive."

"Monroe Magnum ride performance product advantages include ease of fitment with single bonded bushings that ensure very high bushing durability, along with a high temperature resistant sealing system including the use of high temperature resistant hydraulic fluid," he explains. John adds that the specially formulated semi-synthetic fluid improves damping behaviour through more consistent damping over a wide temperature range.

As such, the company's drivers have noticed a significant improvement in comfort and performance with the use of Monroe Magnum heavy-duty replacement shock absorbers.

"No one understands better than our drivers when replacements of important components such as suspension products do the job or not. During our trial of the Monroe Magnum heavy-duty shock absorbers, our driver

feedback has been 100 per cent positive," John says. "Compared to the former ride performance components on the vehicles and trailers in our fleet, the drivers have all been impressed with the improvements in braking and steering response, heavy load handling – specifically with the trailer shock absorbers – and their comfort and subsequent reduced fatigue," John adds.

"Add the fact that the Monroe Australia after sales service is second to none, the trial of the Monroe Magnum heavy duty shock absorbers has definitely been a success for Mansell Bulk Haulage."

EXCEEDING EXPECTATIONS IN THE HARSHTEST ENVIRONMENTS

The familiar road trains are a welcome site to all Territorians providing essential day-to-day necessities, and providing the most regular road services from Alice Springs, catering to all regions and towns up and down 'The Track':

N.T.F.S. — ASCOT HAULAGE Group

N.T.F.S. Pty Ltd is a member of the privately owned Scott Group of Companies headquartered in Mount Gambier, South Australia. N.T.F.S. Pty Ltd commenced operations in 1972, and is now widely regarded as Australia's leading transport consultants to the Northern Territory. From Adelaide, South Australia, Northern Territory Freight Services Pty Ltd and its sister company Ascot Haulage (NT) Pty Ltd provide unique and extensive road, rail, refrigerated, and general freight services to the Northern Territory.

Each week, NTFS run a fuel service to Newmont Australia's 'The Granites Gold Mine' which is located approximately 550km northwest of Alice Springs, Northern Territory, Australia.

This road presents one of the country's most gruelling undulating surfaces imaginable. This road eats cars, trucks, road trains, caravans and just about everything else that travels across it! As such, the trip returns a maintenance regime almost unparalleled anywhere in Australia.

The Problem

As reported by Paul Hallem from NTFS/ Ascot Haulage,

the company is always willing to look at trialling products that may offer significant savings to the operation in regards to performance and product life. Paul stated, "I was experiencing poor shock absorber performance on our trucks and trailers when travelling on the Alice Springs - Tanami Goldfields desert run, resulting in additional down time."

'I was so impressed by the performance of these Monroe Shock Absorbers that I have now started using them on all our Truck & Trailers where possible' Mr. Paul Hallem

The Monroe Solution

Paul approached to evaluate the European Monroe MagnumHD Shock Absorbers for this high impact run.

These shockers were fitted in November 2010. The results were quite remarkable. "With previous shock absorbers from various manufacturers, I was only able to get between 30,000 to 40,000 kilometers before they needed to be replaced," Paul stated.

The Result

"The installation of the Monroe Magnum HD Shockers has not only reduced our cost of shocker replacement, but affected our breakdowns in relation to shock absorber failure to a minimum.

The trialled Monroe Shock Absorbers have exceeded our expectations and have now covered in excess of 100,000 kilometres in 24 months, far exceeding anything else that has been used previously," Paul added.

A PROVEN TRUCK RECORD

Already having runs on the heavy haulage board globally, Monroe are now supplying the same market leading advantages to the Australian Industry.

With our world-leading innovations in shock absorbing technologies, and original equipment supplier of choice to many leading truck brands, you can rest assured from cab to load - we're your reliable option on the road.

For details on your nearest dealer or for more information call 1800 088 205 or visit monroe.com.au

- Double action valving system in bump and rebound
- High Temp resistant hydraulic fluid
- Hydraulic lock-out piston for improved safety
- Single bonded bushing for improved durability

BUILT TO LAST

- ▶ High temperature resistant hydraulic fluid
- ▶ Viton seal improved operating temperature range
- ▶ Double action valving system in bump & rebound
- ▶ Hydraulic lock-out piston
- ▶ Single bonded bushing

With over 100 years of experience in every shock absorber, you know they're built to last.
